

John's MGA & Frogeye Sprite

These are my cars a 1960 Austin Healey 'Frogeye' Sprite and 1961 MGA Roadster.

The Frog was a 4 year project by me. Complete rotisserie restoration with almost all parts replaced except for trans tunnel, bonnet and boot middle sections. All new wings and floor, engine rebuilt with unleaded head. I am considering selling the Sprite and keeping the MGA which has a bit more room.

The MGA was a US import and converted to RHD by the previous owner and I took it on as a rolling project over a 3 year period. Engine rebuilt and new floors, carpets and chrome work.

Both cars have had extensive bare metal paint jobs and polish up nice I think.
