

My little white Sportscar

This is my 1961 MGA coupe MKlll 1622cc. I bought this car about 12 months ago after it had received a partial restoration. I then set about doing a re trim of the interior as it was all original and showing its age. I made new seat covers from a hide I bought from Martrim along with various other fabrics to cover the dashboard and trim panels. The car lived it's early life on the island of jersey then sent back to the mainland. The MG has a full documentary history and showing its original milage and all its previous keepers
