

# Debut Show Virgin

I acquired this car as an abandoned project in February 2018. As you can see from the photos everything needed sorting out I.e. bodywork, inboard brake conversion, wiring all electrics etc.

Long story short, car passed its MOT in October 2019 and I've been buzzing around in it since then

(Dealing with technology, will try to find a "before" shot to add assuming my entry is accepted)
